

SAFETY COLD CLEANER

Excellent cleaning power for heavy oil and dust soiling

Features:

- Water based
- Concentrated special detergent
- Excellent cleaning power for heavy oil and dust soiling
- Especially suitable for cleaning car engines and other drive units, vehicle underbodies, construction and agricultural machinery
- pH-neutral (pH 7-8)
- Safety Cold Cleaner is a detergent with a de-emulsifying effect, which means that only unstable emulsions are formed during the washing process, which supports oil separation in the light liquid separator.

Areas of application:

Automobiles, construction and agricultural machinery, service stations, workshops, trade and industry

Usage:

For intensive cleaning of heavy soiling, the parts are sprayed or brushed sparingly with the concentrated product. For cleaning support, the parts are treated with a sponge, brush or paintbrush. Allow to act for approx. 5-10 minutes. Wash off dissolved dirt with plenty of water.

On floors, hall walls or other large surfaces, the concentrated product or product pre-diluted up to 1:5 with water is best applied with the pre-sprayer, distributed with the scrubbing brush and then sprayed off with water.

The product can be used diluted with water up to a maximum of 1:15. The higher the concentration of the cleaning solution, the more intensive the dirt solution.

In case of extreme soiling, repeat the cleaning process after rough cleaning. The product must not dry during the treatment. This is particularly important for e.g. painted and plastic surfaces, rubber and other seals.

Do not use on hot surfaces!

Use in steam cleaners:

Heavy soiling: recommended mixing ratio 1:5

Light soiling: recommended mixing ratio 1:15

Note:

To ensure de-emulsification, the product must be diluted in the wastewater to a maximum concentration of 0.2%.

Waste water containing oil must be disposed of via a light liquid separator (oil, gasoline separator).

| Container | Article number: |
