

SYNTHETIC ACTIVE OIL

A unique, synthetic oil with an adhesive agent for long-term lubrication

Features:

- A fully synthetic high performance oil with an adhesive agent and long-term lubrication
- Possesses a very high resistance to oxidation and ageing
- No production of resinous residues or bonding
- Offers optimal protection against friction and wear
- Excellent anti-corrosion protection with a long persistence
- A high penetrating effect with a very good flash-off time
- Compatible with all sealant materials
- Stable at temperatures between -40 °C and 150 °C
- Does not contain any white oil/mineral oil
- Manufactured on an ester and PAO basis

Usage:

Shake the can for a short time and spray shortly onto the area to be treated from a distance of about 20 cm. Also can be used in sub-zero temperatures.

Container	Article number:
300 ml	40 27289 00677 2

Areas of application:

For every inspection and maintenance operation. Particularly suitable for use on the smallest components and precision components. For use anywhere where grease is either not suitable or not desired. Excellent for getting track rods, joints and locking cylinders moving.

Synthetic active oil offers optimal protection against corrosion and wear. Significantly longer working lives of equipment are achieved through using this protection effect, even in the most extreme weather conditions.

Important notice - non-compliance may lead to damage!

Our products are intended for the specified areas of application. If the user wishes to use our products for other purposes, he must check whether the product is suitable and approved for that use. We can only provide a guarantee for the stated specifications. Specifications are subject to change. When we disclose certain examples of use for our products, these may have been carried out in controlled environmental conditions - therefore the results may be different in a different, individual environment. Contact us if you have any questions about the products and application examples! When using, storing and disposing of products, the legal and official regulations, our specifications and the manufacturers' specifications must always be strictly observed. Read the instructions for use, operation and maintenance particularly carefully. Danger warnings must be strictly followed. If the products are handed over to third parties, they must be informed accordingly and the documents belonging to the product, such as manuals, data sheets and hazard warnings, must be made available to them.
