

THROTTLE VALVE CLEANER

Special, highly active system cleaner for removing impurities and deposits in the intake and throttle valve area. Excellent dissolving power against oil, grease, rubber, resin and paint residues

Features:

- Improves fuel flow and reduces fuel consumption
- Improves engine and carburetor performance
- Excellent cleaning performance due to 360° valve system and special surface activity
- Suitable for catalysts

Areas of application:

Carburetor and throttle valve cleaning for 2- and 4-stroke petrol engines

Usage:

Spray parts to be cleaned while the engine is stationary and allow to act for 2-3 minutes. Then, with the engine running, spray into the intake or throttle area for approx. 30 seconds, slightly increasing the speed to burn dissolved deposits.
